

Milton Mount Primary School

Computing Progression Document

EYFS, Key Stage 1 & Key Stage 2

(2024 – 2025)

Intent

At Milton Mount we are Technologists! We recognise the huge value and impact that technology plays not only in supporting Computing and the whole curriculum but in all of our daily lives. We understand this and we want our children to be digitally literate and active participants in our digital world. Therefore, we want to model and educate our children on how to use technology positively, responsibly and safely.

We want our children to be creators and our broad curriculum aims to fulfil the National Curriculum requirements whilst also providing enhanced and collaborative learning opportunities, engagement in rich content and supporting pupil's conceptual understanding of new concepts which support the needs of all our pupils.

At Milton Mount our aim is that our children understand that there is always a choice when using technology and we believe that children need to be shown and taught how to use it positively. We are dedicated to ensuring our pupils understand how to stay safe online and we want to model how technology can be used positively. We know that the best prevention for a lot of issues we currently see with technology/social media is through education. We believe that it is vital that we work alongside parents to ensure that they also understand how to keep their children safe online.

Our curriculum starts in the Early Years Foundation Stage where children begin to develop general computing skills through a range of contexts and continues from Year 1 through to Year 6, following the National curriculum content guidance.

Do more

The curriculum is structured and sequenced so that all children actively engage in hands-on learning through a range of tasks that acquire a range of skills to answer a challenge question. Our aim is to deliver and teach exciting lessons that include children engaging with digital technologies in a variety of ways, for example, digital photo manipulation. We aim to instil critical thinking, reflective learning and a 'can do' attitude for all our pupils, particularly when engaging with technology and its associated resources.

Know more

We encourage children to become problem solvers in computational terms and provide repeated practical experience writing computer programs in order to debug programs. We want our pupils to understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation.

Remember more

At the beginning of each lesson, we use Sticky Starters to recap previous learning. Skills, knowledge and vocabulary are revisited and cross-curricular opportunities are planned for. The strands of Digital Literacy, Digital Science and Information Technology are built upon each year to ensure progression. This overlap, repetition and reinforcement helps to give children a deeper understanding of the knowledge and skills across all strands. Online safety is woven into each lesson and additional weekly Online Safety lessons are taught to ensure children revisit the key concepts regularly.

Experience more

Cross curricular links are planned to give the children further experience of different technologies for example AR headsets to visit different places in geography. We plan for children to use technology imaginatively and creatively to inspire and engage all pupils.

Consider more

Our Computing curriculum aims to develop the heart and mind of every child. Computing teaching at has links with mathematics, science and design and technology and our aim is to provide a broad and balanced curriculum whilst ensuring that pupils become digitally literate and digitally resilient. We want our children to be responsible, competent, confident and creative users of technology who know how to keep themselves and others safe.

Computing curriculum map 2024-25

Predominant Area of Computing (Most units include aspects of all strands.)		
Computer Science	Information Technology	Digital Literacy

Computing	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
EYFS	General computing skills are taught through continuous provision					
Year 1	Exploring Purple Mash Online Safety	Grouping and sorting Pictograms Online Safety	Lego Builders Online Safety	Maze Explorers Online Safety	Animated Story Books Coding Online Safety	Spreadsheets Technology outside school Online Safety
Year 2	Coding Online Safety	Making Music Presenting Ideas Online Safety	Questioning Online Safety	Effective Searches Online Safety	Creating Pictures Online Safety	Spreadsheets Online Safety
Year 3	Touch Typing Simulations Online Safety	Spreadsheets Online Safety	Coding Online Safety	Branching Databases Online Safety	Email Online Safety	Graphing Online Safety
Year 4	Coding Online Safety	Effective searches Hardware Investigators Online Safety	Animation Online Safety	Spreadsheets Making Music Online Safety	Logo Online Safety	AI Online Safety
Year 5	Coding Online Safety	Game Creator Online Safety	Databases Online Safety	Spreadsheets Online Safety	3D Modelling Concept Maps Online Safety	Using External Devices Online Safety
Year 6	Coding Online Safety	Blogging Online Safety	Text Adventures Online Safety	Networks Online Safety	Quizzing Online Safety	Understanding Binary Online Safety

Computing skills progression 2024 – 2025

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer Science	<p>Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions</p> <p>Create and debug simple programs.</p> <p>Use logical reasoning to predict the behaviour of simple programs.</p>	<p>Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions</p> <p>Create and debug simple programs.</p> <p>Use logical reasoning to predict the behaviour of simple programs.</p>	<p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</p> <p>Use sequence, selection and repetition in programs; work with variables and various forms of input and output.</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.</p> <p>Understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration.</p>	<p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</p> <p>Use sequence, selection and repetition in programs; work with variables and various forms of input and output.</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.</p> <p>Understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration.</p>	<p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</p> <p>Use sequence, selection and repetition in programs; work with variables and various forms of input and output</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.</p> <p>Understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration.</p>	<p>Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</p> <p>Use sequence, selection and repetition in programs; work with variables and various forms of input and output</p> <p>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.</p> <p>Understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration.</p>
Outcome	<p><i>Children understand that an algorithm is a set of instructions used to solve a problem or achieve an objective. They know that a computer program turns an algorithm into code that the computer can understand</i></p> <p><i>Children can work out what is wrong with a simple algorithm when the steps are out of order, e.g. The Wrong Sandwich in Purple Mash and can write their own simple algorithm, e.g. Colouring in a Bird activity. Children know that an unexpected outcome is due</i></p>	<p><i>Children can explain that an algorithm is a set of instructions to complete a task. When designing simple programs, children show an awareness of the need to be precise with their algorithms so that they can be successfully converted into code.</i></p> <p><i>Children can create a simple program that achieves a specific purpose. They can also identify and correct some errors, e.g. Debug Challenges: Chimp. Children’s program designs display a growing awareness</i></p>	<p><i>Children can turn a simple real-life situation into an algorithm for a program by deconstructing it into manageable parts. Their design shows that they are thinking of the desired task and how this translates into code. Children can identify an error within their program that prevents it following the desired algorithm and then fix it</i></p> <p><i>Children demonstrate the ability to design and code a program that follows a simple sequence. They experiment with timers to</i></p>	<p><i>When turning a real-life situation into an algorithm, the children’s design shows that they are thinking of the required task and how to accomplish this in code using coding structures for selection and repetition. Children make more intuitive attempts to debug their own programs.</i></p> <p><i>Children’s use of timers to achieve repetition effects are becoming more logical and are integrated into their program designs. They understand ‘IF statements’ for selection and attempt to</i></p>	<p><i>Children may attempt to turn more complex real life situations into algorithms for a program by deconstructing it into manageable parts. Children are able to test and debug their programs as they go and can use logical methods to identify the approximate cause of any bug but may need some support identifying the specific line of code.</i></p> <p><i>Children can translate algorithms that include sequence, selection and repetition into code with increasing ease and their</i></p>	<p><i>Children are able to turn a more complex programming task into an algorithm by identifying the important aspects of the task (abstraction) and then decomposing them in a logical way using their knowledge of possible coding structures and applying skills from previous programs. Children test and debug their program as they go and use logical methods to identify the cause of bugs, demonstrating a systematic approach to try to identify a particular line of code causing a problem.</i></p> <p><i>Children translate algorithms that include sequence, selection and repetition into code and their own designs show that they are thinking of how to accomplish the set task in code utilising such structures, including nesting structures within each other. Coding</i></p>

	<p><i>to the code they have created and can make logical attempts to fix the code, e.g. Bubbles activity in 2Code.</i></p> <p><i>When looking at a program, children can read code one line at a time and make good attempts to envision the bigger picture of the overall effect of the program. Children can, for example, interpret where the turtle in 2Go challenges will end up at the end of the program.</i></p>	<p><i>of the need for logical, programmable steps</i></p> <p><i>Children can identify the parts of a program that respond to specific events and initiate specific actions. For example, they can write a cause and effect sentence of what will happen in a program.</i></p>	<p><i>achieve repetition effects in their programs. Children are beginning to understand the difference in the effect of using a timer command rather than a repeat command when creating repetition effects.</i></p> <p><i>Children's designs for their programs show that they are thinking of the structure of a program in logical, achievable steps and absorbing some new knowledge of coding structures. For example, repetition and use of timers. They make good attempts to 'step through' more complex code in order to identify errors in algorithms and can correct this. e.g. In programs such as Logo, they can 'read' programs with several steps and predict the outcome accurately</i></p> <p><i>Children can list a range of ways that the Internet can be used to provide different methods of communication. They can use some of these methods of communication, e.g. being able to open, respond to and attach files to emails using 2Email. They can describe appropriate email conventions when communicating in this way.</i></p>	<p><i>combine these with other coding structures including variables to achieve the effects that they design in their programs. As well as understanding how variables can be used to store information while a program is executing, they are able to use and manipulate the value of variables. Children can make use of user inputs and outputs such as 'print to screen'. e.g. 2Code.</i></p> <p><i>Children's designs for their programs show that they are thinking of the structure of a program in logical, achievable steps and absorbing some new knowledge of coding structures. For example, 'IF' statements, repetition and variables. They can trace code and use step-through methods to identify errors in code and make logical attempts to correct this. In programs such as Logo, they can 'read' programs with several steps and predict the outcome accurately</i></p> <p><i>Children recognise the main component parts of hardware which allow computers to join and form a network. Their ability to understand the online safety implications associated with the ways the internet can be used to provide different methods of communication is improving</i></p>	<p><i>own designs show that they are thinking of how to accomplish the set task in code utilising such structures. They are combining sequence, selection and repetition with other coding structures to achieve their algorithm design</i></p> <p><i>When children code, they are beginning to think about their code structure in terms of the ability to debug and interpret the code later, e.g. the use of tabs to organise code and the naming of variables</i></p> <p><i>Children understand the value of computer networks but are also aware of the main dangers. They recognise what personal information is and can explain how this can be kept safe. Children can select the most appropriate form of online communications contingent on audience and digital content, e.g. 2Blog, 2Email, Display Boards.</i></p>	<p><i>displays an improving understanding of variables in coding, outputs such as sound and movement, inputs from the user of the program such as button clicks and the value of functions.</i></p> <p><i>Children are able to interpret a program in parts and can make logical attempts to put the separate parts of a complex algorithm together to explain the program as a whole.</i></p> <p><i>Children understand and can explain in some depth the difference between the internet and the World Wide Web. Children know what a WAN and LAN are and can describe how they access the Internet in school.</i></p>
<p>Information Technology</p>	<p>Use technology purposefully to create, organise, store, manipulate and retrieve digital content.</p>	<p>Children demonstrate an ability to organise data using, for example, a database such as 2Investigate and can retrieve specific data for conducting simple searches. Children are able to edit more</p>	<p>Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</p> <p>Select, use and combine a variety of software</p>	<p><i>Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</i></p> <p><i>Select, use and combine a variety of software (including</i></p>	<p>Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</p> <p>Select, use and combine a variety of software</p>	<p>Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</p> <p>Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create</p>

		complex digital data such as music compositions within 2Sequence. Children are confident when creating, naming, saving and retrieving content. Children use a range of media in their digital content including photos, text and sound.	(including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.	<i>internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</i>	(including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.	a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.
Outcome	Children are able to sort, collate, edit and store simple digital content e.g. children can name, save and retrieve their work and follow simple instructions to access online resources, use Purple Mash 2Quiz example (sorting shapes), 2Code design mode (manipulating backgrounds) or using pictogram software such as 2Count.	<i>Children demonstrate an ability to organise data using, for example, a database such as 2Investigate and can retrieve specific data for conducting simple searches. Children are able to edit more complex digital data such as music compositions within 2Sequence. Children are confident when creating, naming, saving and retrieving content. Children use a range of media in their digital content including photos, text and sound</i>	<i>Children can carry out simple searches to retrieve digital content. They understand that to do this, they are connecting to the internet and using a search engine such as Purple Mash search or internet-wide search engines. Children can collect, analyse, evaluate and present data and information using a selection of software, e.g. using a branching database (2Question), using software such as 2Graph. Children can consider what software is most appropriate for a given task. They can create purposeful content to attach to emails, e.g. 2Respond.</i>	<i>Children understand the function, features and layout of a search engine. They can appraise selected webpages for credibility and information at a basic level. Children are able to make improvements to digital solutions based on feedback. Children make informed software choices when presenting information and data. They create linked content using a range of software such as 2Connect and 2Publish+. Children share digital content within their community, i.e. using Virtual Display Boards.</i>	<i>Children search with greater complexity for digital content when using a search engine. They are able to explain in some detail how credible a webpage is and the information it contains. Children are able to make appropriate improvements to digital solutions based on feedback received and can confidently comment on the success of the solution. e.g. creating their own program to meet a design brief using 2Code. They objectively review solutions from others. Children are able to collaboratively create content and solutions using digital features within software such as collaborative mode. They are able to use several ways of sharing digital content, i.e. 2Blog, Display Boards and 2Email.</i>	<i>Children make clear connections to the audience when designing and creating digital content. The children design and create their own blogs to become a content creator on the Internet, e.g. 2Blog. They are able to use criteria to evaluate the quality of digital solutions and are able to identify improvements, making some refinements. Children readily apply filters when searching for digital content. They are able to explain in detail how credible a webpage is and the information it contains. They compare a range of digital content sources and are able to rate them in terms of content quality and accuracy. Children use critical thinking skills in everyday use of onli</i>
Digital Literacy	Recognise common uses of information technology beyond school. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.	Recognise common uses of information technology beyond school. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.	Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concern about content and contact.	Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concern about content and contact.	Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concern about content and contact.	Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concern about content and contact.
Outcome	<i>Children understand what is meant by technology and can identify a variety of</i>	<i>Children know the implications of inappropriate online searches. Children</i>	<i>Children demonstrate the importance of having a secure password and not</i>	<i>Children can explore key concepts relating to online safety using concept</i>	<i>Children have a secure knowledge of common online safety rules and can</i>	<i>Children demonstrate the safe and respectful use of a range of different technologies and online services. They identify more discreet</i>

	<p><i>examples both in and out of school. They can make a distinction between objects that use modern technology and those that do not e.g. a microwave vs. a chair. Children understand the importance of keeping information, such as their usernames and passwords, private and actively demonstrate this in lessons. Children take ownership of their work and save this in their own private space such as their My Work folder on Purple Mash.</i></p>	<p><i>begin to understand how things are shared electronically such as posting work to the Purple Mash display board. They develop an understanding of using email safely by using 2Respond activities on Purple Mash and know ways of reporting inappropriate behaviours and content to a trusted adult.</i></p>	<p><i>sharing this with anyone else. Furthermore, children can explain the negative implications of failure to keep passwords safe and secure. They understand the importance of staying safe and the importance of their conduct when using familiar communication tools such as 2Email in Purple Mash. They know more than one way to report unacceptable content and contact.</i></p>	<p><i>mapping such as 2Connect. They can help others to understand the importance of online safety. Children know a range of ways of reporting inappropriate content and contact.</i></p>	<p><i>apply this by demonstrating the safe and respectful use of a few different technologies and online services. Children implicitly relate appropriate online behaviour to their right to personal privacy and mental wellbeing of themselves and others.</i></p>	<p><i>inappropriate behaviours through developing critical thinking, e.g. 2Respond activities. They recognise the value in preserving their privacy when online for their own and other people's safety.</i></p>
