

## **Subana Chowdhury**

As a mother of three, I have always hoped my skills and experience could benefit the school my children attend; by being a governor I hope to achieve this.

I have a young person in year 1 and another about to join in September and so, hopefully, our journey with Milton Mount will be for many years to come.

I am a Maths and Economics teacher and have taught from years 7 to year 13. With 10 years of teaching experience I hope to give an objective and practical perspective as part of the schools Learning Committee.

Prior to teaching I worked in banking for 5 years in a number of different financial roles. I have gained experience and training in customer relations, business development and management. With this industry experience I hope to support the schools resource committee and learn how to best add value here.

Whilst I am still finding my feet in the new role of Governor, I am happy to be a part of a team with a common objective of making the school the best possible place for children to succeed and thrive.
